VISA

How You Pay Matters: 6 ways to make online shopping easy with Visa

Whether it's a local boutique with an online presence, or one of your favourite online stores, it's important to consider ways to stay safe when shopping online.

Visa works hard with your bank to make your payments secure – but there are also a few things you can do to make your online experience safer.

SALE

1 Pay safely in-app

Set up methods like fingerprint or facial recognition for account login and/or payments where you can.

2 Find the right website

Look for the padlock icon when browsing. The web address should begin with https instead of http – 's' indicates secure.

https:

3 Pay it safe

Check your statements regularly for any unusual or suspicious transactions. Be mindful about publicly sharing information that identifies you, like your address, and never share your PINs or passwords with anyone.

4 Beware of phishing scams

Be careful of unsolicited and suspicious emails or phone calls as most financial institutions or government agencies wouldn't call or email to request financial information out of the blue. If in doubt, don't click on any links or download files.

5 Complete your purchase at checkout with ease

Look for one-click options at checkout, to shop online easily without the need to insert your card details every time.

BUY

6 Stay up to date

Install the latest software on your computer, tablet or phone.
